

ALCOHOL-BASED HAND RUB

- Use antibacterial hand rub (ABHR) when water and soap are not available. Do not use ABHR if hands are visibly dirty or greasy
- Use an ABHR with at least 70-90% alcohol
- Put enough product on hands to cover hands, fingers and wrists
- Rub hands together until they feel completely dry (about 20 seconds)
- Do not rinse ABHR
- Ensure all wall dispensers and containers are out of reach for children as it can be harmful if swallowed
