

Monthly Profile of COVID-19 Cases

768 confirmed cases of COVID-19 have been reported in Renfrew County and District as of August 26, 2021*.

Likely source of infection for confirmed cases of COVID-19 in Renfrew County and District, by episode date**

Notes:

*Quarterly updates each month or as pending information is confirmed (last updated August 26, 2021)

**Episode date is intended to approximate symptom onset date (the earliest date available between date of symptom onset, specimen collection/test date, or date reported to public health).

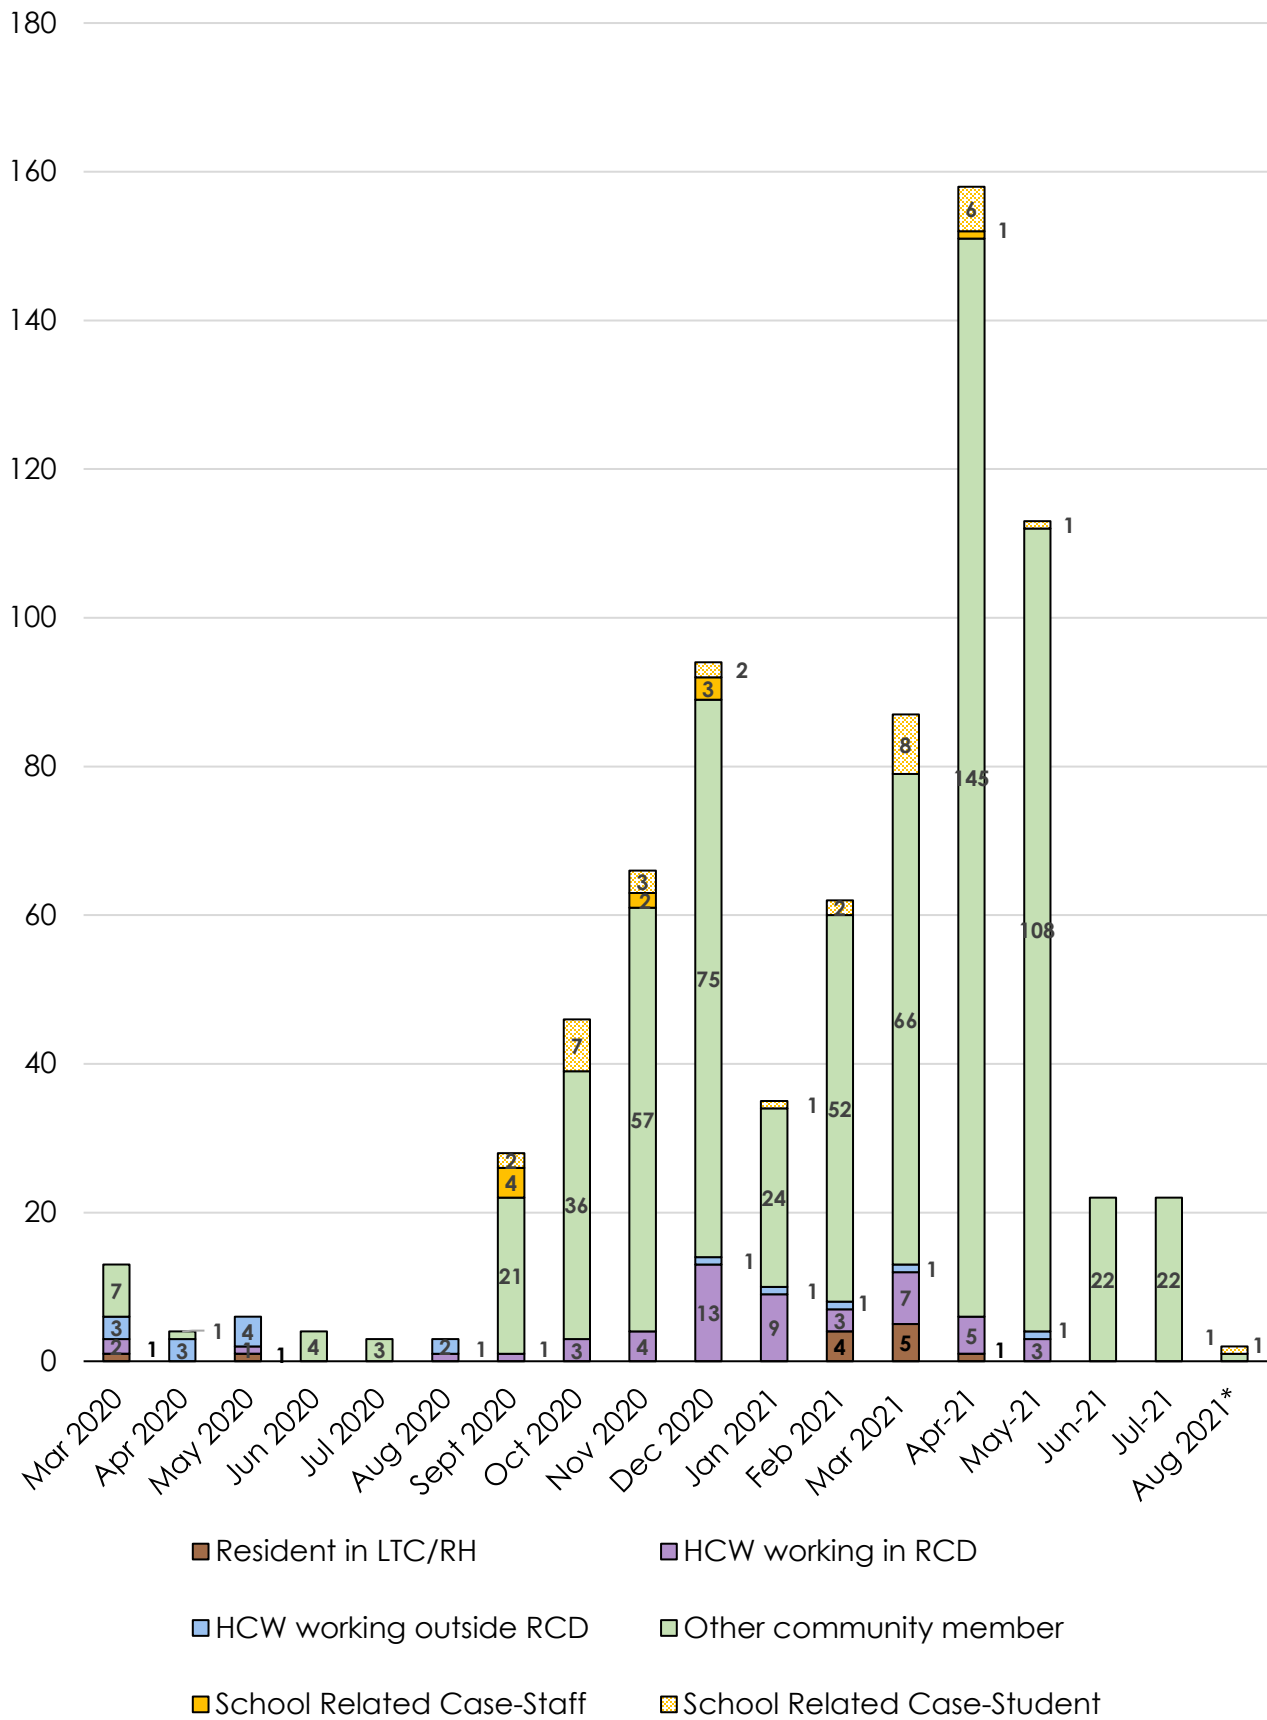

Likely source of infection refers to how cases were most likely exposed to COVID-19 defined on the Government of Ontario webpage <https://covid-19.ontario.ca/data/covid-19-case-data-glossary#infection-source>

- **Travel**= Individuals who travelled outside of Ontario within 14 days before their symptoms began
- **Close Contact**= Individuals who likely caught COVID-19 from an infected person that they were physically close to
- **Outbreak Setting**= Individuals who caught COVID-19 in a specific shared space or setting, in RCD or outside of RCD, including a long-term care/retirement home, school, or other community setting
- **Community Spread**= when someone tests positive but we cannot trace the source because the person 1) did not travel, 2) did not knowingly have contact with another infected person and 3) is not associated with an outbreak
